PROFILE

A creative thinker, adept in software development and working with various data structures. Programming student with experience in many software libraries across multiple programming languages such as C, C++, and Javascript. Created software used by 500+ people.

EMPLOYMENT HISTORY

Angular/Spring Boot Fullstack Developer Intern at Swisscom SDC Rotterdam
September 2023 — February 2024

Designed and implemented an application for Swisscom customer support as part of the Oppensource team. Participated in Agile Scrum sprints to ensure quality was built into the development process. Developed the Angular frontend and designed its layout as well as the Java Spring Boot backend.

Freelance Software Developer at Journey Survival
October 2018 — October 2019

Created and maintained 12 internal Java projects that helped run a SpigotMC Server with 25+ concurrent users. These software projects were built upon emerging updates of the Spigot API combined with the TabuuCore Library.

EDUCATION

Codam Coding College
2020 — 2024

Hogeschool Utrecht
2017 — 2019

HBO-ICT Software & Information Engineering

HAVO, Christelijk Lyceum Veenendaal
